

The (iFactories) Initiative

المصانع الذكية

●● ifactories

An initiative to support the transformation of the industrial sector toward the "Fourth Industrial Revolution" by measuring factory readiness and digital maturity to enable them to invest in technology infrastructure and automation using the Smart Industry Readiness Index (SIRI).

Initiative objectives:

Increase the efficiency of the industrial sector and enhance its competitiveness.

Reduce unskilled workforce and create promising quality opportunities for Bahrainis.

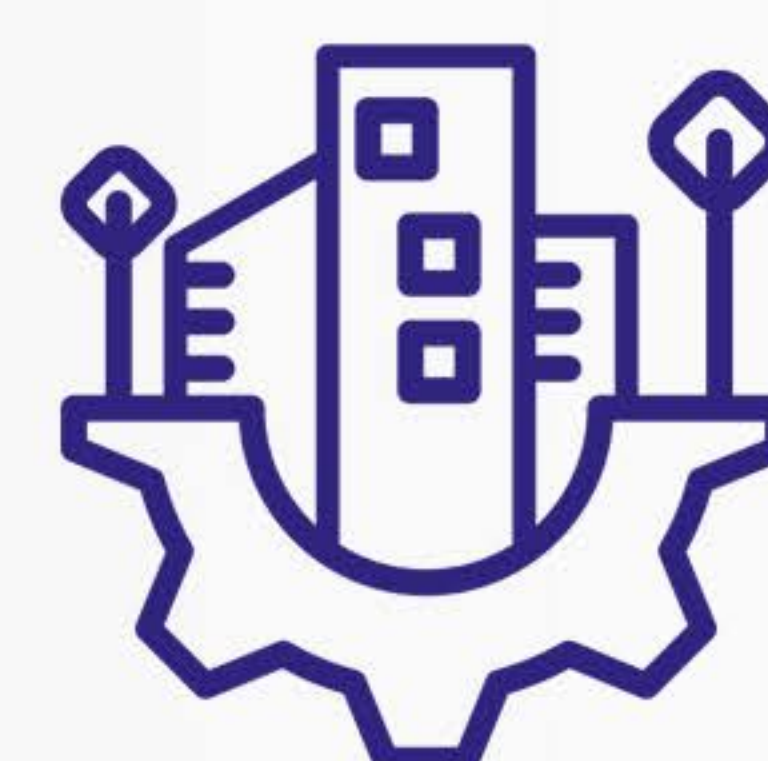

Accelerate and stimulate research, development, and innovation in the industrial sector.

Transfer regional and international best practices in industrial facilities.

Ensure sustainability of the industrial sector by enhancing the effectiveness of resource management.

Create appropriate technical infrastructure to attract more investments.
